

# Certificate

ERGONOMICS  
UNIT

This certificate confirms that the

## COMFORT ZONE software

supplied by

## ERGO SQUAD

is fit for purpose for carrying out Display Screen Equipment (DSE) risk assessments and identifying risks and providing ergonomic and practical solutions for the users as well as employers.

This summary certificate is based on evidence of satisfactorily completing wide variety of live DSE risk assessments undertaken by FIRA's Ergonomists. These risk assessments were found to have successfully identified the risks users were subjected to and solutions provided were considered to be good enough to minimise or eliminate the risks identified.

The Comfort Zone software includes all the aspects of risk assessments identified by the Health and Safety Executive in order to determine the suitability of work station under the European Commission's Display Screen Equipment (DSE) Directive (90/270/EEC) and the Health and Safety (Display Screen Equipment) Regulations, 1992 as amended by the Health and Safety Regulations 2002. It is considered that Comfort Zone is an excellent tool in undertaking DSE risk assessments and identifying risks and providing ergonomic solutions for the elimination or minimizing the risks identified.

Levent Çaglar, Head of Ergonomics Unit
